### System of Care Expansion Logic Model

#### Need and Inputs

**Federal Inputs:**
- SOC Expansion Grants for expanding and sustaining the SOC approach
- Federal TA
- National Evaluation

**Jurisdiction Inputs:**
- Previously developed SOC expansion plans
- Previous community-level SOC grants
- Previous SOC expansion efforts
- Resources committed to SOC expansion

**Need for wide-scale adoption of SOCs:**
- SOCs are in selected communities but not yet implemented broadly
- Positive outcomes for SOCs are documented
- More children, youth, and young adults and their families could benefit

#### State-Community Partnerships

- State, tribes, or territorial systems and community system(s) create partnerships for two-level expansion strategy including:
  - State, tribal, and territorial grantees identify and link with communities for focus of expansion efforts
  - Community grantees link with lead state agency for youth with mental health conditions for systemic changes to support SOC expansion efforts

#### Expansion Planning Activities

- States, tribes, territories, and communities develop comprehensive strategic plans for SOC expansion including:
  - Create SOC Expansion Team
  - Conduct self-assessment and determine areas to be addressed to expand SOCs
  - Determine goals for expansion at state, tribal, and territorial system level and at community level
  - Determine overall approach to expanding SOCs with two-level strategy
  - Identify expansion strategies in core strategy areas of policy, services, financing, training, and strategic communications
  - Complete a strategic plan that includes key elements
  - Establish priority goals and strategies
  - Develop a financing plan

#### Expansion Implementation Activities

- States, tribes, territories, and communities implement SOC expansion strategies at system and community levels including:
  - Systemic changes in:
    - Policy and partnerships
    - Services and supports
    - Financing
    - Training and workforce development
    - Generating support through strategic communications
    - Evaluation/CQI
  - SOC implementation:
    - Develop SOC infrastructure
    - Develop treatment services and supports based on SOC philosophy
    - Provide services
    - Collaborate across child-serving systems
    - Incorporate family-driven, youth-guided approaches to systems and services
    - Incorporate cultural and linguistic competence into systems and services, and address disparities

#### Outcomes

Outcomes are achieved at the state, tribal, and territorial system level, the community level, and the child and family level including:

- State, Tribal, and Territorial Level
  - Systemic changes are implemented:
    - Changes in policy, requirements, interagency partnerships, evaluation/CQI
    - Changes to develop/expand services and supports based on the SOC philosophy
    - Changes in financing and resource investment
    - Changes in training, TA, and workforce development
    - Changes in support for SOC expansion

- SOC approach is implemented:
  - SOC values/principles are implemented
  - Home- and community-based services and supports are implemented
  - SOC infrastructure is implemented
  - Resources are invested in home- and community-based services and supports
  - Services and supports are provided to increasing numbers of children with SOC approach

- Child and Family Level
  - Children and families benefit:
    - Children and families receive effective home- and community-based services and supports with the SOC approach
    - Children and families experience positive clinical and functional outcomes
    - Children and families are satisfied with their service experience
